CHRYSLER IMPERIAL. (P.A.F.)

Each \$3.00, 3 for \$7.95, doz. \$31.80

A new, new red rose for your garden. No matter how many other reds you have, you will want Chrysler Imperial for its smashing, rich crimson color. It has oxblood-red overtones and lustrous garnet in the depths of the bloom. With an impressive pedigree—Mirandy and Charlotte Armstrong are its parents—this was sure to make a name for itself. The long, slender buds and large, high-centered blooms are equally appealing. Sturdy stems carry the flowers on a well-knit, dark-foliaged plant.

BETTY UPRICHARD

CHARLOTTE ARMSTRONG. (Pat. 455)

(All-America Rose Selections Award, 1941.) It is one of the finest roses and ranks among the top varieties of all times. Magnificent open blooms of vivid cerise; lovely, long, carmine-red buds. This plant will become one of the largest in the rose garden, usually producing its flowers singly and always on long stems. The foliage is semi-glossy, deep green and highly resistant to mildew. See illustration on page 6.

COUNTESS VANDAL

CHRISTOPHER STONE.

Each \$1.35, 3 for \$3.40, doz. \$13.50

CHRYSLER IMPERIAL. (P.A.F.)

Each \$3.00, 3 for \$7.95, doz. \$31.80

COUNTESS VANDAL.

Each \$1.50, 3 for \$3.90, doz. \$15.00

The first color to show in this rose is a brilliant bronze, lightening toward gold at the base. The long slender buds hold their artistic shape for several days as the petals unfold in a lovely play of carmine-pink, buff and gold. Blooms are erect, ideal for bouquets and for cutting.

CRIMSON GLORY. *Each \$1.75, 3 for \$4.65, doz. \$18.60*

For a complete description of this fragrant red rose, see the back cover.

PEACE. (Pat. 591)

Each \$2.50, 3 for \$6.60, doz. \$26.40

The rose of roses! In color, form and vigor this is the acme of perfection. Peace has received so many awards, both in this country and abroad, that it has won a real name for itself. And when you grow it for yourself, you will see that its superiority has not been exaggerated. Truly enormous in size, with a strong plant to match. Enchanting pale yellow flowers with an edging of pink that gradually flushes the whole bloom. The fact that the color changes from day to day makes it extremely difficult to illustrate this rose adequately. Blooms are borne singly on wonderful stems. Glossy, leathery, very dark foliage. Give the plant plenty of room, because it really grows! See illustration on page 6.

PICTURE.

Each \$1.35, 3 for \$3.40, doz. \$13.50

There just are not adequate adjectives nor color plates good enough to do justice to the perfect pink buds and flowers of Picture. Nor could they suggest the warmth of the rich salmon undertones, so cheerful and glowing. Each flower is heavily petaled, substantial and long lasting, and the strong, vigorous plants produce continuously.

The sturdy, compact plant grows to 2½ to 3 feet in height and is clothed with rich green foliage. It is healthy and hardy. Plant Ma Perkins for an abundance of bloom all season long. Named for the lovable radio personality and chosen by All-America judges as the only floribunda selection for 1953. See illustration on page 2.

Gradually the rose-pink deepens until at last it is deep red. Clusters of 25 to 30 buds on one stem are not uncommon.

It slowly opens to a glorious 5-inch bloom with shades of canary-yellow, pale gold, cream, pearly white and appleblossom. This new climbing sport has the same fine foliage and strong stems so popular in the bush. You will get the same huge, perfectly formed flowers with the same lasting qualities.

DREAM GIRL

DREAM GIRL. (Pat. 643)

Each \$2.25, 3 for \$6.00, doz. \$24.00

The comparatively new everblooming hardy climbing and pillar rose. The outside petals of the opening buds are very light appleblossom-pink. It frequently takes several days for the full-petaled buds to open and show the salmon-pink inside petals. One of the most appealing qualities is the pleasing, spicy, unforgettable fragrance. Plants established for a year or more will produce a fine crop of flowers in early June followed by a succession of blooms throughout the summer, ending with a glorious display in early fall. The plant is absolutely disease-resistant, healthy, vigorous.

DR. J. H. NICOLAS. (Pat. 457) *Each \$2.00, 3 for \$5.25, doz. \$21.00*
After an exceptionally heavy display of gorgeous deep rose-pink blooms in June, new flowering shoots appear all summer. The blooms are unbelievably large and the fragrance is rich, lovely and intriguing.

HIGH NOON. (Pat. 704) *Each \$2.25, 3 for \$6.00, doz. \$24.00*

The intense shade of clear shining yellow displayed in the medium-sized, well-shaped buds, cannot be found in any other rose on the market today. It was the 1948 Regional All-America Award winner for the Pacific Coast and Southern States. The flowers are borne on long stems with light green, glossy foliage. The plant is fast growing and should have a post, wall or some support to best display its beauty. High Noon produces a big crop of magnificent buds in the spring, continuing throughout the entire growing season.

NEW DAWN. *Each \$1.50, 3 for \$3.90, doz. \$15.00*

One of the hardiest everblooming climbers! New Dawn repeats its perfect hybrid-tea-like blooms continuously all season. Glorious roses with the precious pink of apple blossoms and a delicate appealing old rose fragrance in profusion on a plant that is easy to grow, requires little care and takes little ground. The trim, perfectly formed, pointed buds are most artistic in their appeal, superb for use in arrangements. They have fine long stems. Sturdy canes grow rapidly; even one plant makes a gorgeous display on trellis, arbor or fence.

PAUL'S SCARLET CLIMBER.

Each \$1.10, 3 for \$3.00, doz. \$11.75

The scarlet-red, semi-double flowers are freely produced in clusters of three to ten on much-branched canes. A strong grower and very hardy. Canes are flexible and easily tied to a fence, pergola or post. A more gorgeous mass of spring color is hard to find.

Papershell PECAN TREES

Pecans have become an important and popular crop in many parts of the South. The trees are attractive and well shaped and most satisfactory for producing shade. They grow fast and begin to produce nuts in about five years.

Trees should be spaced about 50 feet apart. They succeed in sandy loam or light clay but not in sour or poorly drained locations. They deserve good cultivation and fertilization, for they are long lived, productive and very profitable. Cotton, potatoes or melons may be planted between the trees until they start to bear nuts; then it is well to plant a cover crop such as soy beans, vetch or clover and turn it under.

PECAN—OFFICIAL STATE TREE OF
TEXAS

MAHAN

A giant, early-bearing pecan with thin shell. The nut is the largest and the shell the thinnest of all pecans we have tested. Sometimes trees begin to bear when only 4 to 5 feet tall and two years old, although this is a better record than average. Mahan is a new variety that will be hard to beat.

THOMAS BLACK WALNUTS

Bears very young, often the second or third year after planting. Nuts are of immense size and have delicious flavor. Thin shells and large kernels that come out easily because they are so large and plump. Grown in almost every state. Very hardy and a fast grower.

SUCCESS

SUCCESS

Large, oblong nuts, tapering to the apex; reddish brown with purplish markings. Thin shells and partitions. Kernels large, full, yellow; flavor sweet and quality very good. Very easy to crack. The tree is a strong grower and a regular and heavy bearer.

STUART

STUART

A large, strong tree with a fine head. Nuts large, of good quality, with medium thin shell. It stands the cold better than most varieties and can therefore be grown farther north than many, as well as in the deep South. Well known and extensively planted.

SCHLEY

SCHLEY

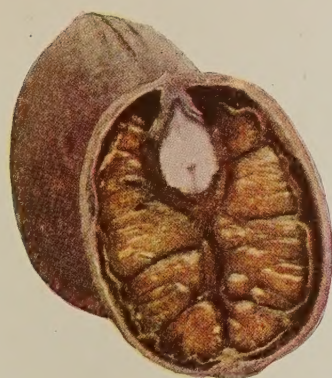

Nuts long, medium to large in size, with very thin shell. Kernel full and plump, with rich nutty flavor. The tree is a thrifty, vigorous grower. A very fine variety to market, for in quality of meat and thinness of shell it is surpassed by no other variety.

WESTERN SCHLEY

WESTERN SCHLEY

Here is a variation of the old standard Schley that is often considered the standard of excellence among pecans. The flavor is of exceptionally high quality. The long, slender nuts have thin shells, easy to crack. An early-ripening variety, which means that it can be a very profitable one.

MONEYMAKER

MONEYMAKER

A medium-sized nut with medium shell, well filled with a rich meat. Cracks easily. The tree is an upright grower with dark green foliage. An early and prolific bearer. This is proving to be a very profitable commercial variety.
